

Producer Application for the Sale of Processed Foods: 2009  
Avon Farmer's Market

A major purpose of this market is to sell food grown locally by the seller. Persons eligible to receive this authorization must therefore make processed foods mainly from their own produce. If you believe you should have a special exception, explain on a separate sheet. Sellers of processed foods must also comply with the State of Minnesota's rules for the production and sale of such foods as well as with any required licensing.
